Protect your ears!

Customised ear protection is now available to purchase from the Royal Berkshire Hospital Audiology Department

Ear protection can be very useful if you are exposed to excessive noise or are bothered by sounds as you are trying to sleep. Noise induced damage is one of the leading causes of permanent hearing loss and tinnitus due to accumulative effects. This leaflet will outline the ear protection available from our Audiology Department.

Sleep Plug

Reduces the outside sounds to help you get some peaceful sleep. Custom made in a soft silicone to aid comfort. Available in a wide selection of colours.

£45 per pair

Swim Plug

They prevent water from entering your ear. They float and are made out of a soft silicone to aid comfort. They are available in a wide selection of colours.

£17.50 each

£35 per pair

Noise Protection

Available in a solid plug or in a filtered ear piece to reduce outside sounds.

The filter allows the wearer to hear normal conversational level but reduces the effect of louder sounds. Available in a wide selection of colours.

Solid £45 per pair

Filtered £55 per pair

Musician's Ear Pieces

Reduces the outside sounds so that the wearer can listen to their music at a lower level.

£115 per pair

Shooting and Motorcycle Protection

These devices will allow the wearer to hear their environmental sounds and speech but will protect them from the harmful loud and often sudden noises.

Motorcycle from £120

Shooting Behind-The-Ear £295

Shooting In-The-Ear £470

[Why should I be wearing ear protection?](#)

Exposure to excessive noise levels can lead to long-term hearing loss and/or tinnitus. By wearing ear protection, you can still work or enjoy your activities without putting your ears at risk.

[How noisy is too noisy?](#)

If you are exposed to 85 decibels or above at work, your employer should provide you with ear protection. You may wish to consider ear protection if you attend music events or have hobbies involving noisy machinery. For more information see our leaflet *Your hearing and noise exposure* available www.royalberkshire.nhs.uk/patient-information-leaflets/ or ask for a copy in the Audiology Department.

[What to expect from wearing customised ear protection?](#)

At first, it may feel strange to be wearing ear protection, especially if you are not used to having anything in your ears! It can therefore feel as if your ears are 'blocked'. With consistent use, people often become less aware of this 'blocked' sensation. If there are any problems with the ear protection, please let us know as soon as possible.
