We take infection prevention and control very seriously. As an outpatient, the best way you can help contribute to preventing germs passing from one patient to another is by washing your hands or using the hand gel which you will find in all clinical areas.

If you have recently had diarrhoea and/or vomiting, please wait until 48 hours has elapsed from your last symptom before visiting the hospital. Patients/visitors who suspect that they may have an infection should telephone the ward or department and ask for advice before coming in.
