

Royal Berkshire
NHS Foundation Trust

Introduction to the gynaecological cancer multi disciplinary team (MDT)

The aim of this leaflet is to provide you and your family or friends with information about the multi disciplinary team (MDT) involved in your care at the Royal Berkshire Hospital. There are also some useful telephone numbers and website addresses which you may find helpful.

The Multi Disciplinary Team

The multidisciplinary team or MDT comprises of doctors, nurses and other health care professionals who are involved with your individual care. The MDT meets on a weekly basis on a Monday afternoon to discuss patients who have been newly diagnosed with a gynaecological cancer or have been undergoing treatment or require their cases to be reviewed.

These meetings allow the team to formulate a plan of treatment best suited to the individual.

The information assembled at these meetings will be written in your hospital notes so that it is clear to your clinician (doctor) what investigations and treatment are required and then you will be notified at the next opportunity.

Your GP will also be notified within 24 hours of the MDT meeting with the proposed plan of further investigations and any treatment planned.

Who are the gynaecological cancer MDT?

- **Lead clinician**, who will take overall responsibility for the service.
- **Consultant oncologist**. Specialist in cancer and its treatments.
- **Consultant gynaecologist**. Specialist in the surgical treatment of cancer.
- **Consultant radiologist**. Specialist in the examination and interpretation of x-ray / scans and other investigations.
- **Consultant histopathologist**. Specialist in the examination of biopsy / specimens and identification of cancer cells.

- **Clinical Nurse Specialist.** A nurse specialising in gynaecological cancers or Supportive and Palliative Care who will provide support and information during your cancer experience.
- **MDT Co-ordinator.** A person who provides the relevant information for the team and coordinates the meeting.
- **A Key Worker** from the MDT is designated to each patient. The Key Worker will act as the main point of contact and is responsible for coordinating your care. This information will be written in your hospital notes to inform other health care professionals.

The Key Worker for gynaecological cancer patients will be the Clinical Nurse Specialist, Lisa Clarke.

Useful numbers

Miss R Vijayanand (Surgeon) secretary	Tel: 0118 322 7281
